CAREER PROFILE

Computer Science student (final years in progress) and full-stack developer with hands-on experience designing end-to-end web platforms, from authentication and secure payments to responsive interfaces, using React, Node.js, Python and modern database systems (MySQL, PostgreSQL, MongoDB). Strong grounding in REST API development, data security practices, and containerized deployment (Docker, Kubernetes). Drawn to roles that combine software development with data infrastructure and operational technology, and committed to continuous learning of cloud platforms, analytics tooling, and data-protection standards to support organisational research and technology operations.

TECHNICAL SKILLS

- Languages & Frontend: JavaScript (ES6+), HTML5, CSS3, React.js, Tailwind CSS, Bootstrap
- Backend & APIs: Node.js, Python, REST API design & development, Authentication & Authorization
- Databases: MySQL, PostgreSQL, MongoDB — schema design, querying, administration (project-based)
- Infrastructure & DevOps: Docker, Kubernetes (containerization), Git, GitHub, cloud-native tooling (self-directed learning)
- Security & Data Protection: Authentication safeguards, password hashing, input validation, secure transaction handling
- Productivity & Support: VS Code, Google Workspace, technical documentation, troubleshooting & debugging
- Practices: Responsive design, Agile collaboration, cross-device testing

EDUCATION

Bachelor of Computer Science (In Progress)

2023 – Present

Karatina University | Kenya

Relevant coursework: Web Development, Database Systems, Data Structures & Algorithms, System Analysis & Design, Software Engineering, Networking

Kenya Certificate of Secondary Education (KCSE)

2019 – 2022

Makueni Boys' High School — Grade: B+

KEY PROJECTS

Service Listing Platform

React.js · Node.js · PostgreSQL

- Designed and developed a full-stack marketplace enabling service providers to list and manage offerings while allowing users to search and book services efficiently
- Built a responsive UI paired with robust backend logic to ensure seamless, low-friction user interaction across devices
- Designed the relational database schema and query logic underpinning listings, bookings, and provider management

Online Contribution / Payment Portal

React.js · Node.js · MySQL · Bootstrap

- Engineered a secure system to manage user contributions and transaction records, incorporating authentication safeguards to protect sensitive financial data
- Implemented rigorous form validation and password hashing to strengthen data security and prevent common input-based vulnerabilities
- Administered the MySQL database supporting transaction history and user records

CERTIFICATIONS & TRAINING

- Full-Stack MERN Development — Power Learn Project
- SQL Basics — HackerRank
